Profile

I'm Qasim Rokeeb, a front-end developer passionate about creating digital experiences that solve real problems and spark engagement. With a strong grasp of modern tools like React, Tailwind CSS, and Next.js, I specialize in building fast, responsive websites — from personal portfolios to impactful community platforms. As a lifelong learner, I'm also diving into Web3, SEO, and digital strategy to expand my reach and relevance. Skilled in React, Tailwind CSS, JavaScript, Nextjs, Framer motion, HTML.

Education

BTech in Software Engineering, *Federal University of Technology, Akure. FUTA.*
06/2023 – present
Akure, Nigeria

Diploma in Software Engineering, *Baze University*
2023 – present
Abuja, Nigeria

Certificates

- Udemy
- EdApp

Interests

- Reading
- Writing
- Public Speaking
- Content Creation
- Designing

Projects

Al Qudwah, *Front End Developer*
08/2023 – 2024
Designed and built the AL-Qudwah School website from scratch, focusing on usability, scalability, and security. Managed the full development lifecycle, including requirements gathering, UI/UX design, coding, testing, and deployment. Provided ongoing support and updates to ensure the platform met the evolving needs of the school community.

Barakah Oasis, *Lead Developer*
12/2024 – Feb, 2025
Collaborated directly with the founders to design, develop, and optimize the organization's website for improved search engine ranking and user engagement. Led the end-to-end development process, from wireframing and prototyping to deployment and ongoing maintenance. Implemented SEO strategies and analytics tracking to enhance the foundation's digital presence.

Capstone Project, *Front End Developer Intern*   09/2024 – 2025
Gained hands-on experience in developing and building decentralized applications using web3 tools, languages, and frameworks such as React and Solidity. Collaborated with other developers on multiple projects, participated in code reviews, and contributed to the design and implementation of smart contracts. Successfully built and presented a capstone project demonstrating acquired skills.

Meme Vibe, *Front End Developer*   04/2025 – 05/2025
Designed and developed responsive UI components utilizing Next.js and TypeScript, ensuring seamless user experiences across various devices and platforms. Led the implementation of best practices in UI/UX, accessibility, and performance optimization. Collaborated with cross-functional development teams to successfully integrate the final product into a Farcaster frame, tailored for on-chain users, and contributed to the deployment and post-launch support.
